A NEW DAWN IS RISING. * * *

No one is going to miss 2020. There has been plenty of bad news for the last 12 months, but 2021 is upon us, and this is the most optimistic I have been about the beef industry for a long time!

Why you may ask?

- Cattle numbers have held steady or decreased slightly over the past year. Export markets are slowly but surely opening up to US beef.
- Many industries have struggled through the pandemic, but the beef industry has adapted fairly rapidly to radical changes in the marketplace and production system.
- Some segments adapted too quickly and seized an opportunity to price gouge and take advantage of producers and consumers at the same time. I think these practices will be exposed over the next few months and we will benefit from a more just and fair system.
- Chaos and uncertainty make fertile ground for innovation. New ways of marketing cattle are being explored and implemented that can add margin to the cow calf producers.
- Consumers have gotten closer to their food producers. I feel bad for the restaurant industry and what they are going through, but consumers are cooking more themselves and they want to buy their beef from the source if they can. The less middle men taking a cut of the profits the larger the percent of the consumer dollars will get to the producers.
- Certified Angus Beef program is powerful. According to Paul Dykstra at CAB we would normally see \$9 to \$10 CAB spreads in the summer. In 2020 that spread increased to \$17.00 even with a disastrous food service industry.
- Consumers have told us that after toilet paper, beef is one of the most important things if they are going to quarantine.

The beef industry is resilient and has been around for a long time. We provide a wonderful product that makes people happy, improves the environment and helps people live a healthy lifestyle. We should all be proud of what we do and how we can adapt to new challenges. I am excited to see what the next few years will bring.

Welcome!

Thanks so much for your interest in our program. We are excited to welcome everyone to the ranch for this year's bull sale. We love the new blacktop road that will make your trip much more pleasant. The bulls and heifers will be penned prior to the sale around our barn, but the sale will still be a video auction. The big difference will be you sitting on bleachers in our calving barn instead of the comfortable Outlaws basement. The sale will be broadcasted on DV Auction again just like previous years for those of you that can't make it to the ranch.

The bulls are enjoying the winter and they are doing great. We have enjoyed feeding the bulls at the ranch this year. They like the extra space, and I like the fertilizer they are depositing in our fields. We have never offered such a quality set of bulls from top to bottom. We have selected 20 outstanding high ratioing heifers from the replacement pen. We will be offering 20 registered heifers sold as commercials for the first time as well.

I would like to thank all of the friends and family for all of the help and support they have given us. Special thanks to Tracy Davis for putting up with me every day. The most vital part of this operation is you, our valued customers. Please let us know how we are doing and how we can do a better job serving your needs. We hope to see you all at the ranch March 1.

Best Angus, Back Row, L to R: Lyle and Sue Best, Vawnita and Pete Best, Jaden Murphy, Kim and Lee Murphy; Front: Kyle Best, Rita Hovet and Morgan Murphy

BEST Angus BULL SALE

Profitable *by* DESIGN ~ Efficient *by* NATURE

Sale Day Phones:

Big Blue Sale Barn

Casey Jenz.....608-234-1998
American Angus Association

Scott Ressler.....701-391-7310
North Dakota Stockmen's Association

Sale Terms & Conditions: Terms of the sale are cash. Each animal will be sold to the highest bidder. Any bidding disputes will be settled by the auctioneer. Any person attending the sale will do so at their own risk. Neither the owner, nor any person connected with this sale assumes any liability, legal or otherwise.

Sale Format: The bulls will be on display at the ranch prior to the sale. The auction sale will be conducted for the first time ever at our ranch. Please see the next page for details. DV Auction will produce a video prior to sale day that we will be using to conduct the sale instead of running the bulls through an auction ring.

Volume Discount: We will discount 3% on purchases of 3 or more bulls, 5% on 5 or more bulls, and 10% on purchases of 10 or more bulls by one buyer or buying group.

Semen Interest: We are keeping a semen interest in many of the bulls. These are bulls that we may want to collect semen on in the future. If any semen is sold, we would share in the revenue generated from the sale of semen. Buyer has full possession and full salvage value of the bull.

Genetic Conditions: All bulls are guaranteed free from all known genetic conditions recognized by the American Angus Association (as of March 1, 2021).

Sight Unseen Purchase Program: If you are unable to attend our sale, but you would like to purchase a bull, please give us a call and we'll be glad to help you with your selection. Describe what you are looking for in a bull, and what your price range is. We can assure you that your bid will be handled with integrity and your money will be handled like it is our own. If you do not like what we selected for you, we will keep the bull and you can keep your money.

Delivery: We offer free delivery for the bulls within a 300 mile radius of Watford City. The heifers will be ready to go following the sale.

Lunch: Please join us at the ranch for lunch before the sale

NEW SALE LOCATION!

Most of you have never been to our place. We live in the middle of nowhere, but it is not too hard to get here anymore. Navigation works most of the time, if you type in our address. Make sure navigation does not guide you north of Watford City like it has been known to do. THE RANCH IS SOUTHEAST OF WATFORD CITY.

DRIVING FROM WEST, NORTH OR SOUTH

You will want to take US Highway 85 until you come to the County Road 37 intersection. Once on County Road 37 you will drive 7.8 miles to 120th Ave. The intersection is on a curve with an old school house and you should see a sign as well. You will be turning off pavement at 120th Ave and you will stay on the gravel and scoria road for 3 miles until you arrive at the sale location.

DRIVING FROM THE EAST

You will be driving in on Highway 23 take the Watford City Bypass. Once on the bypass you will take the first left turn onto 26th F for just a few feet. You need to quickly turn right onto County Rd 37. Stay on County Rd 37 for 7.5 miles until you get to 120th Ave. You will see signs and an old school house by the curve intersection. You will now be on a gravel and scoria for the next 3 miles to the sale location.

S A V Resource 1441

We are excited to be offering Resource genetics again in this year's sale. We have watched this bull for many years. They have been my favorite sire group nearly everywhere that I have seen them. We would have used him earlier, but we feel strongly that it is our responsibility to our customers to make sure the females are going to fit with our breeding philosophy and the unique environment that we call home.

Resource is a very complementary mating for most of our cows. We have a high maternal calving ease cow herd. Resource will add muscle, rib, fleshing ability, and performance to our cattle. It is rare when a bull comes along that breeds as true as what Resource has. He has been bred to almost every kind of cow in the Angus breed and the progeny are powerful and extremely consistent regardless of the cow's pedigree. Resource progeny are not only stout, but they have great breed character, and excellent feet. Resource will moderate frame size and milk. We are very confident these are "Badlands" bulls that will sire some of the best calves you have ever sold. These bulls will also leave you daughters that are easy fleshing and will add longevity to your cowherd. Resource passed away in November, 2019. We feel strongly these genetics will be timeless and in strong demand for many years.

I strongly believe that purchasing a group of flush brothers is the best way to add uniformity to your calf crop, and the best way to add consistency to your cow herd. This is an outstanding set of ET brothers. We used a full brother to these guys two years ago. He has proven to be a low birth weight sire that sire excellent performance and muscle in a very attractive pattern. Dam is proving to be an outstanding cow. She takes away birth weight while adding performance. An added bonus is that she is also above average for marbling. She has multiple daughters that have become donors as well. These bulls will change your herd.

Cow & Environment Connection

If bull selection wasn't hard enough already, the study of epigenomics or fetal programming is proving that even if cattle have specific genes, they may not express them if the environment does not promote those genes. You have to make sure the cattle you are buying are being managed in a way that is in sync with how you manage your operation, or you may get some unexpected results.

How we do business:

We want to earn a reputation of having excellent quality cattle, but even more importantly we want our customers to feel they have been treated fairly and received excellent value in their purchases. Not every animal we sell is going to turn out as anticipated We want to know about it, so we can make it right.

Thoughts about **FERTILITY**

I attended a meeting in Kansas City where we were discussing fertility in the Angus cow herd. Using the heifer pregnancy EPD as our measure, the Angus cowherd has reduced its fertility over the last 50 years. I find this fact very concerning. I started thinking back to all the recent conversations with producers that are concerned by their larger open rates.

I am sure this same observation would be seen in all of the major breeds in the United States as well. The first thing I thought of is if fertility/ longevity is the most important trait for the profitability of commercial ranches, how can nearly every other EPD be increasing and the fertility EPD be declining. How could we as breeders let our priorities so far out of line. We are enrolled in Maternal Plus to aid in improving fertility trait collection and improving accuracy and reliability of the fertility EPDs for the Angus Association.

I think there are a few reasons that this has happened.

1. Obviously, other traits are taking priority when breeding and selection decisions. The industry has seen increases in growth, mature size, and milk, and improvements in carcass traits. I am not saying those traits don't matter because they do. However, fertility can't be an after-thought when making breeding decisions. At Best Angus, we have always taken a balanced approach to trait selection trying to improve our cattle, but we will not sacrifice fertility. It is the first trait that we think about. We have sent a lot of beautiful cows to the sale barn because they were open or late.

2. The second issue is our national cow herd may still be just as "fertile", but we have bred for an animal that no longer functions in the natural environment and needs additional inputs to breed in a timely fashion, neither of which help your bottom line. The result is the same; open cows for you, or a much larger feed bill. Our ranch and management style really challenges fertility. This challenge is good for our customers (but an expensive challenge for us). The breed up on the females we have sold to other producers has been excellent. We are proud of those reports.

3. Not intentionally, but it is likely that breeders are selecting genetics from lines of cattle that have fertility issues. Fertility has always been a front of the brain trait when making breeding decisions because it is the #1 economic trait. At Best Angus, we keep daughters and bulls from cows that breed up early to use for our next generation of genetics. When we bring in outside sires, we investigate the programs and the genetics these bulls come from to make sure fertility is one of their top priorities as well. We feel there is a body type that works in our environment as well. We want our cows to be wide bodied, but wedge shaped with refined shoulders and neck. Last, but not least they need to have a feminine triangular shaped head, a critical phenotypic indicator of fertility.

DVAuction Broadcasting Real-Time Auctions

Can't make the sale? **Bid from home with DV Auction's "real-time" internet bidding service!** Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab.
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction - a DV representative will notify you when you are approved.
3. Tune in for the sale and make your purchases!

After the sale, contact Pete to arrange transportation and payment. High speed internet is required for successful bidding – be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding: If you can't make time to watch the sale, register a proxy bid and DVAuction represent your bid while you're away. Look for the "proxy bid" tab on the auction listing and fill in your maximum bids. They'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. DVAuction support can always be reached at (402) 474-5557.

BUILDING BLOCKS OF A BEST

PHILOSOPHY

- The basics of breeding cattle is to concentrate favorable genetic combinations over and over again
- There is a visual "type" that works in our environment. It is imperative we continue stacking that type
- The dam is the most important member of a pedigree
- If you keep stacking great cows, you can't help but end up with a great herd of cows

TESTING GENETICS

The only true way to determine what genes should be concentrated is to test the animals under certain management.

- We do not creep feed. It is the best way to determine maternal prowess of a cow.
- Our cows run in big pastures and rough terrain. These pastures put tremendous pressure on survival instincts, libido, sound feet and legs, fleshing ability, and above all else, fertility.
- We winter graze as long as possible. Our cows need to hustle to find top forages, flesh easily and stay sound.
- We pasture calve, if the weather allows. Our cows need to find a place to calve, clean up their babies and get them up and nursing. We weigh and tag them in the pasture, so they need to be calm and trusting of me, or they find a new home.

DEVELOPMENT

Our method to develop the bulls is slow and steady. On sale day our bulls would look more impressive and would sell for a higher price, if we fed them more, but:

- We want our bulls to be hard and sound, so they can cover your cows and come back home in decent flesh.
- We want to feed the bulls aggressively enough so we can test feedlot performance and carcass traits, but we refuse to overfeed our bulls jeopardizing their feet and long-term metabolic health. We have customer reports of 10 year old bulls still covering cows.
- The bulls are developed in large pens, so they get plenty of exercise, making sure they are athletic and ready to go to work.

T ANGUS BULL

In theory our perfect bull would look awesome, gain well, have a clean pedigree backed by many generations of great cows. He will be developed responsibly for longevity and raised in a similar environment to our commercial customers. Of course, he would have an agreeable disposition and moderate birth weight.

REPORT CARD

Cow Prowess	A+
Big Pasture Ready	A+
Winter Grazing	A+
Pasture Calving	A+

SIRE

- Focus on proven bulls with high EPD accuracies over 90%
- Proven bulls mean less genetic "surprises"
- Pathfinder sire, with great reputation as a female sire
- We travel to look at progeny in a variety of environments before selecting a new sire
 - We try to incorporate fresh genetics, but shy away from certain bloodlines that do not meet our standards
 - Dam is extremely important in sire selection

DAM

- We believe the cow is the core building block behind our bulls
- Generations of top cows make up a great breeding bull
- Easy to buy sons out of sire X, but it takes years and generations to develop a cow that fits your environment
- We like 10 year old cows, because they have to be fertile, sound and productive to last that long
- We tend to focus on low birth weights cows with above average nursing ratios and marbling

It is very rare for us to use an unproven outside bull. It is also not very often a bull like this comes around. We tried to purchase Tribute, but came up short. Tribute was an extremely impressive individual. He crushed his contemporaries at nearly every important measurement. He has an easy going, gentle demeanor. He comes from my favorite cow family currently at McCumber Angus Ranch. We are very happy with the Tribute calves so far. He is a surefire calving ease bull. What has been impressive to me is the power that he puts into his calves in such a clean attractive pattern. The top Tributes are some of the highest performance calves.

The daughters are what I was hoping they would be. They have deep sweeping rib, a wide hip, and clean necks. They are very attractive and they can hold their cute little Angus heads high. I still think Tribute will be a frame moderator in most programs. They definitely have the look of badlands cattle.

Dam is one of our top 5 cows. She has an average birth weight of 76 on 6 calves. We flushed her to Tribute last year and they were all under 80 for birth weight. I would feel comfortable using this bull on heifers. He is an excellent bull either way.

DVAuction

Broadcasting Real-Time Auctions

Can't make the sale? **Bid from home with DV Auction's "real-time" internet bidding service!** Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab.
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction - a DV representative will notify you when you are approved.
3. Tune in for the sale and make your purchases!

After the sale, contact Pete to arrange transportation and payment. High speed internet is required for successful bidding – be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding: If you can't make time to watch the sale, register a proxy bid and DVAuction represent your bid while you're away. Look for the "proxy bid" tab on the auction listing and fill in your maximum bids. They'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. DVAuction support can always be reached at (402) 474-5557.

ONE EQUATION for all profitable businesses:

$$\text{INCOME} - \text{EXPENSE} = \text{NET PROFIT}$$

CAN YOUR COWS BE MORE PROFITABLE?

Profitable by Design, Efficient by Nature

is not just a slogan at Best Angus and Quarter Horses. With nearly all of the decisions that we make, we try to consider if this decision is going to help us and our customers be more profitable. We try to manage our operation's resources to maximize net profits the same way any commercial operation should. Each ranch has its own unique opportunities and challenges. None of us can copy someone else's operation, but we can use other's ideas and incorporate some of the ideas we think might work for us.

Maximum production will certainly NOT make us the most profitable, but neither will cutting all of the expenses.

INCOME – EXPENSE = PROFIT is a very simple equation, but it is the heart of all successful businesses.

The equation is simple, but the management that influences this equation is anything but simple. Expenses (hay, supplements, breeding, interest, depreciation, health) can be very complex and interrelated. Income (cull cows, steer calves, heifer calves, other on- and off-farm income) is a little easier to determine, but even harder to predict, and it is difficult to influence the cattle market.

I would argue that none of us are as profitable as we could be. Coffee shop bragging rights tend to focus on price and weight of the best calves sold. Many consultants and speakers talk about how to cut costs and more and more producers are talking about how to become low-cost or low-input producers.

Reasons to Cull Beyond the 2 O's

• What are the 2 O's?

- Old and Open

• Economics...

- More potential value for heifer calves

• Mid October 2016:

94 633# steers \$126.75/cwt (\$802/hd) (Topped sale)

104 560# heifers \$158.00/cwt (\$884/hd) (Topped sale)

– Same sale same breed, different herd:

560# heifers sold for \$136/cwt (\$761/hd)

- Lower culling rate/retain more cows

- Sell more heifers

• Traits beyond convenience!!!!

THE ECONOMICS

- In herd \$86/hd difference heifers vs steers

- Between herds \$120/hd difference heifers vs heifers

How do you make your cowherd more profitable?

STEP ONE: Take time to write down your operations strengths and weaknesses. Where do you fit into the beef industry today and in the future?

- Capital
- Labor resources
- Feed resources
- Climate
- Risk tolerance

STEP TWO: Set Your GOALS for YOUR herd (don't be afraid to dream a little):

1. Biological type that fleshes easily and can thrive on roughage under various conditions. Goal - graze 10 months out of the year, weather permitting.

2. Extremely fertile cow herd, so we don't have to spend extra money developing replacement heifers and culling top producing cows because they are open. Goal - pregnancy rate above 95%.

3. Excellent udder structure, so you do not have to cull cows for poor udders or help calves get started. Goal - all sound functional udders.

4. Ideal foot and leg structure to improve longevity and foraging ability. Goal - no poor feet and legs.

5. Steers that are in high demand by feedlots. Goal - have above average ADG and gain an extra ¼ ADG on the same feed intake.

6. Steers in high demand from packers. Goal - grade above 90% CAB without yield grade 4s.

7. Heifers in demand for replacements. Goal - heifers that bring a premium in the market.

8. Dispositions that are easy and safe to handle requiring less labor and less stress on the animals and the cowboys. Goal - no bad attitudes.

9. Intelligent cows that make calving easy and moving cattle simple reducing the labor requirements and reducing stress levels. Goal - no dummies.

10. Moderate cows with genetics and management to have the flexibility to produce 950lbs carcasses. Goal - 1250 pound cows.

WHAT WOULD MY "DREAM" HERD BE WORTH IN CUMULATIVE NET PROFIT?

1. Grazing an extra two months.
Conservative savings of \$.50/cow/day = \$30/hd/yr.

2. Reducing your cull rate for pregnancy by 5% (\$500 heifer development costs) = \$25/hd/yr.

3. Eliminate Structural issues if you cull 5% of your cows due to poor udders, or lameness issues \$25/hd/yr.

4. Feeder calf premium due to strong reputation of \$3.00/cwt on 550 lbs steers

\$16.50/hd/yr.

5. Premium on heifers (if they brought the same as steers) conservatively adding an extra \$50/hd.

The beauty of most of these profit centers is that they are free! They do not take extra inputs or expenses, you just need to select the correct genetics. **The result is \$146.50/head!**

STEP THREE: Start making decision that will take you towards your goals.

HOW CAN WE HELP?

- If you would like, we would be happy to help you with setting goals for your operation.
- We are trying to help our customers develop a reputation for high quality Angus females followed by higher sale prices for your females.
- We will continue to challenge our cattle to fit our environment.
- We will keep striving to make our herd fit our goals.
- We can help you source females that should fit your goals. We have females for sale and many contacts for additional high quality females.
- Of course, we will be more than happy to help you with your bull selection to make sure you are getting the right genetics to keep you moving toward your dream cowherd.

Best Rainmaker 7008 was our high selling bull in 2019; he sold to Perry and Sandy Ecker. We used him clean up in 2018, and we AI'd to him the past two years. He is one on my favorite bulls that we have raised. He was one of the heaviest calves at weaning and blew away his competition on our high forage feed test. He has an extremely laid back, easy going demeanor. He stays in excellent shape and is a very efficient breeder. He is moderate framed and very stout. We will calve his first daughters this spring and they look the part so far.

For those of you following our program you, know how much I like Sitz Rainmaker 11127. I would go back and use 11127, but I think 7008 will be more consistent siring the type that we like. He is heavier muscled and more moderate in his frame. His offspring still are soggy, deep, fast growing and have the same terrific dispositions. His dam was an absolutely perfect uddered, 1200 pound, soggy, easy fleshing, five frame cow. She is a member of the outstanding Marie cow family from Connolly Angus in Valier MT. His maternal sister has become my favorite donor cow. The Rainmaker daughters are making excellent young cows.

Dam has been one of our all time great producers. She was still a qualifying Pathfinder at age 15 and being flushed a couple of times. This bull is one of her best. We used him on a group of young cows. Don't miss this potential herd sire.

I have to thank Scott Davis for pointing out this bull to me. He has a gold star, proven pedigree. Winchester is a direct son of N Bar Emulation EXT, one of the heaviest used sires of all time with over 38,000 progeny reported. His dam is the great Coleman Donna 386, the matron of the Donna family for Coleman Angus in Montana. This may be an "old pedigree", but the bull has a strong EPD profile. I have been pleasantly surprised by the bull calves. They are thicker and much more masculine than EXT sons typically are. They have good muscle with a wide hip and excellent rump shape.

The Winchester bulls were our high selling sire group in our 2017 sale. They were the second highest marbling and the highest ribeye sire group. We were so impressed, we decided to purchase Angus Alliance International's semen interest in him. He is a true heifer bull that will give you plenty of performance when used on mature cows. This spring we will be finally getting a true test on what the daughters are like. They are absolutely gorgeous. This is not very surprising considering the sisters to Winchester that I saw in Missouri last year were three of the nicest cows I have ever laid eyes on.

Coleman Donna 386, Dam of
Angus Alliance Winchester 975

LOT 61

Here is a bull we used on registered cows last year. His dam is a very powerful pathfinder cow. She stems from a long line of donors that are members of the Marie family at Connolly Angus in Valier MT. He should be a heifer bull, but you may need to keep an eye on them a little bit.

Young calf out of one of our top young cows. Dam is a full sister in blood to our herd sire 7008. She is moderate framed, extremely deep bodied, nice fronted with a perfect udder.

Best Box Cross 291

We really believe that LAR Alliance 64L was a tremendous bull. We have been trying for quite some time to determine which bull we will use to carry on these valuable genes in our program. We want a sire that will produce power calving ease bulls and that is exactly what Box Cross does. Ash Coullee purchased this bull in 2013. He was a standout individual out of our top calving ease cow. He had a 66 pound actual birth weight, 106 weaning ratio and 107 yearling ratio. He was also the top marbling bull that year with a 148 IMF ratio.

While we continued to use 64L, Box Cross was doing an excellent job at Ash Coullee. His progeny were very popular with many top selling bulls coming out of this high selling sire group at Ash Coullee. The daughters are doing an excellent job. They have snug udders and small teats. The milk EPD says +36 which is not very representative of his daughters. They have an average nursing ratio of 100 with 55 daughters reporting.

He is an absolute sure-fire calving ease bull. We used him on some of our higher birth weight cows last year and he dramatically reduced their birth weight as well. His progeny are extremely deep ribbed and moderate framed. They don't have the frame of the 64L's, but they perform extremely well on our low energy ration. They should be excellent low input cattle. Box Cross will continue to see heavy use in our program. Best Box Cross 291 semen is available. Contact us.

Shiny Aimous, A.K.A. "Shiny" has been a treat to work with. He is a year ahead of schedule on how we typically develop our sale horses, but he is ready. I don't know if there is any such thing as a coming 4 year old kids horse. I would describe Shiny's best use is as true family horse. He is athletic enough for mom and dad and will make a good heading or heeling horse. He has been used rounding up cattle in the Badlands. He doesn't mind going off by himself and he is sure footed. There is absolutely no spook, but he pays attention to his surroundings. I have no doubt he will be an excellent kids horse with just a little more experience and age. He has had novice and skilled riders on his back and he adjusts to their level quickly. No bad habits that we know of. His full brother is Kyle's horse right now.

Two Bucks Buckaroo, A.K.A. "Amos" has been a bit more of a challenge. He is smart, kind and athletic. He has a tendency to over react at times. He was fairly easy to start, but would spook and startle on his first rides out in the hills. He doesn't jump anymore he just freezes or flinches now. The frustrating part is a pheasant will fly up underneath him no problem, and then you ride a little way and flinches because a clump of grass looks a little funny to him. Experienced riders will get along with him fine and he will only get better with time and experience. I think he belongs in the arena roping steers. He has another annoying habit, every once in a while he likes to pull back when he is tied up. In the right situation, he could be a great fit. In the wrong situation we will have a very dissatisfied customer.

Best Angus HEIFERS

**FLUSH
SISTERS**

Many of these heifers are A.I. sired and out of the top cows in our herd. We have been focusing on fertility, sound structure, and udder quality for over 30 years. These heifers are a product of that dedication. They are designed to be profitable and efficient with nature.

We are proud of these heifers and we expect that they will work in your program. We will guarantee them to breed during your first breeding season or we will replace your heifer or give you credit for a future purchase.
